

THE CRYO SCULPTING LAB

Lead Pipeline & Automation Plan

Meta Ads → Landing Page Form → GoHighLevel CRM

Overview

This plan defines a clean lead-management structure for The Cryo Sculpting Lab. Every lead captured through the landing page form enters one pipeline and moves through clear, single-meaning stages. Automation workflows run in the background to respond instantly, reduce no-shows, follow up on their own, and sync conversion events back to Meta for smarter ad spend.

Pipeline — Cryo Sculpting Lab | Lead Pipeline

1	New Lead Form submission lands here automatically. Fresh, untouched leads.
2	Contacted First call, SMS, or email has been sent. Awaiting a reply.
3	Qualified Lead has replied and is a genuine fit — right intent, area, and budget.
4	Consultation Booked Appointment is scheduled and confirmed in the calendar.
5	Consultation Completed Lead attended and the assessment / plan discussion is done.
6	Client Won Treatment package purchased — lead is now a paying client.
7	Nurture No-show, undecided, or gone quiet. Parked here for long-term follow-up.

Note: “Lost” is handled as a tag / status rather than a pipeline stage, so the board stays clean and focused on active opportunities.

Automation Workflows

These workflows connect to the pipeline above — each one triggers on a specific action and moves leads forward automatically.

W1	Speed-to-Lead — Instant Response Fires on form submit: auto SMS + email within 60 seconds, notifies staff, sets stage to New Lead.
W2	Missed-Call Text-Back Automatically texts any caller whose call isn't answered, so no lead slips through.

W3	Lead Nurture Drip Multi-day SMS + email sequence for unresponsive leads — value, social proof, and a soft offer.
W4	Booking Confirmation Triggers when an appointment is set; confirms details and moves stage to Consultation Booked.
W5	Appointment Reminders 24-hour and 1-hour reminders before the consultation to cut down no-shows.
W6	No-Show Recovery Auto rebooking sequence for missed appointments; moves the lead into Nurture.
W7	Post-Consultation Follow-Up Nudges leads who attended but didn't buy on the spot, guiding them toward Client Won.
W8	Client Onboarding Welcome message + preparation instructions the moment a lead becomes a client.
W9	Review & Referral Request Post-treatment ask for a Google review and a friend referral.
W10	Win-Back Reactivation Periodic re-engagement for cold Nurture leads to revive old opportunities.
W11	Meta CAPI Event Sync Pushes Lead, Booked, and Purchase events back to Meta for better ad optimization.
